Power Connectors

Wood Dale, IL– October 2008 – The Phoenix Company of Chicago introduces a new series of Power Connectors to its product line.

With a 40 amp max current rating, Phoenix's Power Connectors are designed to meet the increasing system power requirements that are driving the need for improved current density. Contacts are screw-machined for precision, high-reliability, and high-current applications.

Features to note:

- Single Power Connector accommodates a maximum of 40 amps based on a 20°C temperature-rise with zero airflow.
- Secure, push-on snap facet for easy and quick mating.
- Available in board-to-board and cable-to-board configurations.
- SMT, Cable, and Thru-Hole designs.
- Pick-and-place and tape-and-reel versions.
- Custom cable assemblies also available.

Phoenix's Power Connectors are ideal for: **high-wattage power supplies, servers, storage enclosures, communications equipment, redundant power distribution systems, and medical applications.**

*Meet RoHS compliancy standards.

For more information, please contact The Phoenix Company of Chicago at (800) 323-9562.
