Enable True 5G+ Passenger Connectivity with Phoenix PkZ ARINC Contacts.

Designed for high-density IFE and onboard network systems, Phoenix PkZ contacts; available in Sizes 5, 8, 12, and 16, deliver reliable high-frequency performance up to 18 GHz across a broad range of standard and custom cable configurations.

With constant impedance maintained through axial mating tolerances up to 0.110", PkZ technology ensures stable signal integrity during blindmate module and tray engagement, minimizing performance loss across LRU interfaces.

Key Benefits:

- Optimized for high-throughput IFE and cabin systems.
- Supports high-density ARINC architectures.
- Reliable performance across repeated blindmate cycles.
- Scalable across multiple contact sizes and cable types.

PkZ ARINC Contacts
Size 5, 8, 12, & 16
Performance to 18 GHz
